Make: WST

Base Model: 4900SA

Model: WESTERN STAR 4800/4900SB
CHASSIS

Mileage: 235778 miles

Are you currently seeing this same issue on
other DTNA vehicles at your location?: no

Vehicle Systems Involved

FIRE

Good morning,

Has anyone ordered a loaded cab from DTNA? We have a cab that had a fire in the dash that took out the dash, heat system, upholstery, and windshields. What surprises are we in for or is it actually plug and play? We know we have to make the changes that we did originally but hope this is the way to go.

Thank you,

Ted

when you look in DTNA home page, there is a cab&glider sale in dtna ressources, in this page,you clic on more info for skeleton and trimmed cab and you see that if you order a trimmed cab, it comes complete with original install parts.

I have had several new cabs ordered off the vin. I had one that the PTCAN wiring at the 76 pin was miss wired and had to replace some terminals with the smaller ones. Another one had a missing ground for the driver window. Caused most driver controls to be inop. Those were the only two I was involved in. Also I believe we had to flash ECUs like they were new. This was for P3 Cascadias though.
