

Ferrari North America

Technical Information

Date: April 2021
 Bulletin #: 2732
 Campaign #:
 Supersedes:
 Section: 8

Model: **GTC4LUSSO**

Subject: Procedures involving Engine Control Node (NCM) ECUs

Please note that a number of vehicles of the aforementioned model have been subject to **Campaign 453**, in which the original Engine Control Node (NCM) ECUs were replaced with other ECUs with a different hardware number.

Whenever it is necessary to replace the Engine Control Node (NCM) ECUs, in addition to identifying the correct part number for the **Assembly Number** of the vehicle from the **Spare Parts Catalog**, it is also necessary to check the **hardware number** of the ECUs installed on the vehicle and ensure compatibility with the software versions installed on the vehicle.

The **hardware number** of the Engine Control Node (NCM) ECUs may be determined by performing a **SCAN-IN** with the **DEIS** diagnostic tool, as shown as follows (Fig.1):

ECU	Attribute	Value
NCMR - Engine Right	ENGINE SOFTWARE NAME [UACC_SWNAME_ASC]	D1735E_09I3_B51M09E
----	----	----
NCMR - Engine Right	EXTENDED IDENTIFICATION [1x]	----
NCMR - Engine Right	DRAWING NUMBER	338799.001
----	----	----
NCMR - Engine Right	EXTENDED IDENTIFICATION [1x]	----
NCMR - Engine Right	HARDWARE NUMBER	0261S18281

The correct spare part numbers to be ordered from the **Spare Parts Catalog** in accordance with the **hardware numbers** of the NCM ECUs identified on the vehicle are indicated in the following table.

NCM ECU Hardware Number	Part number to be ordered from Spare Parts Catalog
261S08750	291539
261S18281	337737

Thank you for your co-operation.
