VIN: 3AKJHHDR1NSNA1658

Model: NEW CASCADIA 126 INCH
SLEEPERCAB

Model Year: 2022

Make: FTL

Mileage: 31593 miles

Base Model: PT126SLP

Are you currently seeing this same issue on
other DTNA vehicles at your location?: no

Vehicle Systems Involved

ELECTRICAL

So it seems the new P4's continue to have ground issues. This 2022 unit came in with no start. had issues connecting to the MCM, ACM and TCU. Active faults 520193/14, 520194/14, 520222/12, 520230/12, 1482/12, 1483/12, 1231/14 and 625/8. After prioritizing faults, directed to T/S 625/8, turns out the GNDE at the MGJB was a poor connection. The troubleshooting in the manual was incorrect as far as wire and pinouts go. Had to contact CSC, they sent draft troubleshooting to us which was also not 100% correct as far as the pinouts went.
