

# WME3 Retrofit electrical steering column adjustment

Version 1

## **WME3 Workshop campaign with customer notification - Retrofit electrical steering column adjustment**

### **Important Information:**

- Please note that this PPN information serves as preliminary information.
- At the present time, no statement can be made about the availability of parts. Together with our suppliers, we are working at high priority to procure the required capacities of components. As soon as these are available and a retrofitting of the electric steering column adjustment is possible, we will inform you immediately. In the meantime, please refrain from requests regarding the availability of parts.
- The Technical Information and the corresponding customer notification letter will be published at a later date.

## Overview

Due to worldwide semiconductor bottlenecks at individual suppliers, a temporary exchange of the steering column had to be made. For this reason, the affected vehicles were temporarily equipped with a manual steering column adjustment instead of an electric one.

For this reason, the electric steering column adjustment must be retrofit on the affected vehicles.

Until the electric steering column adjustment parts are available, the steering wheel position on the affected vehicles can only be adjusted manually.

We are working with high priority to procure the necessary spare parts for retrofitting.

Please arrange for this measure to be carried out immediately on the affected vehicles once further information is available.

<b>Model type</b>	Taycan (Y1A / Y1B), 911 (992), Panamera (971), Cayenne (9YA/9YB)
<b>Model year</b>	2021
<b>Manufacturing period</b>	Between 5/10/2021 and TBD*
<b>Vehicle specifications</b>	Electric steering column adjustment (I-No. 2C4, 2C7)
<b>Number of affected vehicles</b>	TBD*

\*Please note that vehicles from current production are added to this campaign on a daily basis and the VIN list will therefore be updated frequently. Always check PCSS for open Workshop Campaigns. The manufacturing period and the number of affected vehicles may still change due to volatile availability of the control units.
