P4 MANUAL FAN SWITCH

Vehicle Information

VIN: LM4685

Model: P4

Model Year: 2019

Mileage: 454511 miles

Make: FTL

Are you currently seeing this same issue on other DTNA vehicles at your location?: no

Base Model: CASCADIA

Vehicle Systems Involved

ELECTRICAL

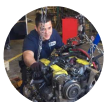

This is information to assist other techs needing to add a fan override/manual to a P4 Cascadia. Different from the P3. The switch part number is A06-90128-005 and the switch ID is 032. Easy enough to install the switch in a blank spot on the MSF sub bus panel. In DDL it will see the switch and tell you there is a extra sub bus switch. In fan parameters in the CPC you will have to enable manual fan override. You will then have to go into the sSAM parameters, MSM MSF, go to switch ID 32 and select the correct parameter which is A0304472058-001. You will then have to activate the switch a few times to be recognized. Hope this helps others.
