

Volvo Chassis - Stemco Hubcap Plug Will Not Stay In

On Volvo model VN, VHD trucks built with hub cap 20421922 or using the 85105316 hub cap, the hub cap comes with a .7874 inch (20 mm) diameter plug that has a vent slit. The Volvo replacement part number for this plug is 92103-5001.

These hub caps can also be retrofitted to utilize a larger diameter plug that has better venting capability. Kit number 85105366 contains a replacement sight glass and a larger diameter 1.312 inch (33.3 mm) plug 1577627. This larger plug has a hole to vent instead of a slit and is less susceptible to popping out.

Note: The 1.312 diameter is measured at the end of the flare. The diameter at the neck is smaller.

92103-5001

Volvo	
	VN,VHD
Production Hub Cap P/N	20421922
