Product Change Notice - Weep hole reduction from 6 to 4 on window widths 60" and larger

Dear Valued Customer:

Lippert will be reducing the number of weep holes from 6 to 4 for windows larger than 60" wide. We have determined through internal testing that this change will minimize potential water entry points while maintaining more than sufficient water management. Additionally, reducing the weep hole count will help align our building processes to match other window series within the company.

There is no change in installation or operation with the weep hole reduction. The change will be made on a running basis, starting on or around June 5.

8800BT shown with 4 weep holes for widths larger than 60".

Products affected are: 8800 PW, DW, T-Bar Series windows.

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle

VP of RV Sales
