## CAMPAIGN BULLETIN

### Expiration Notification – Wheel Valve Stem Nut

Reference: **P9241**

Date: **May 13, 2021**

Attention: Dealer Principal, Sales, Service & Parts Managers

Affected Models/Years:	Affected Population:	Dealer Inventory:	SERVICE COMM Expiration Date:
2008-09 Rogue (S35) 2009 Murano (Z51) 2009 cube® (Z12)	N/A	N/A	May 13, 2021

#### \*\*\*\*\* Campaign Summary\*\*\*\*\*

In 2009, Nissan launched a Voluntary Service Campaign on certain 2008–2009 Rogue, 2009 Murano, and 2009 cube® vehicles registered in states that do not use heavy concentrations of road salt in the winter, to replace the Tire Pressure Monitoring System (TPMS) nut with new, more corrosion resistant ones. Nissan determined the material used in the nut on the Rogue, cube®, and Murano that secures the TPMS sensor to the wheel was not manufactured to specification and may corrode and potentially crack if driven regularly in areas where a heavy concentration of road salt is used. If this occurs, the nut may come out of the sensor causing the TPMS lamp to illuminate. If the TPMS lamp is disregarded, and the vehicle continues to be driven in this condition, the tire can quickly lose air pressure resulting in a flat tire.

This customer service campaign and customer reimbursement for these repairs are no longer available. The expiration of this Voluntary Service Campaign has no effect on the status of Voluntary Safety Recall R0909.

#### \*\*\*\*\* What Dealers Should Do \*\*\*\*\*

1. Service Comm will deactivate **P9241** on any unrepaired VINs on **May 13, 2021**. No further dealer action is required.

#### \*\*\*\*\* Release Schedule \*\*\*\*\*
