GMC	Terrain	2020	ALL	ALL	ALL	M3D M3H M3U

Involved Region or Country	North America and NA Exports.
Condition	Transmission fluid leak on vehicles equipped with a GF9, 9TXX transmission assembly.
Cause	The transmission fluid leak may be fluid that remained in the top pockets of the transmission assembly that was not thoroughly cleaned during assembly that may now be seen underneath the vehicle.

Correction:

Clean any transmission fluid seen.

Inspect the transmission fluid level and adjust to correct level as needed.

Install the dye into the transmission assembly and road test for a minimum of 15 miles, ensuring the transmission fluid temperature gets to operating temperature.

Then use the black light to inspect for visual signs of the dye.

If dye is detected, address the leak as needed.

If dye NOT detected, NO further repairs are needed.

Warranty Information

For vehicles repaired under the Powertrain coverage, use the following labor operation. Reference the Applicable Warranties section of Investigate Vehicle History (IVH) for coverage information.

Labor Operation	Description	Labor Time
-----------------	-------------	------------

8480958	Clean residual transmission fluid. Add dye and road test a minimum of 15 miles to get transmission fluid temperature to operating temperature. Use black light to inspect for dye.	0.8 Hrs.
