TOL NOTICE (US&CA) – May 11, 2021

TOL Ref. # 18497-SVC

CONNECTIVITY NAVIGATION NOT FUNCTIONAL ON SPEED TRIPLE 1200 RS

We have been made aware that customers of the New Speed Triple 1200 RS with Apple iPhone handsets will initially have limited functionality using the My Triumph Connectivity System. This is to be rectified soon in a future instrument software update for this model expected in late July/early August.

For Apple iPhone users this will mean, that temporarily, they will not be able to access the navigation functionality on the connectivity system. It will still appear like the navigation can be paired within the setup menu and be visible within the instrument trays, however this will not work until the software release.

All other features of the system will work as usual. Speed Triple 1200 RS customers with Android phones will not be affected by this.

If you have any additional questions, please contact Triumph Customer Support at (888) 284-6288.
