## REVISION SUMMARY

Under AFFECTED VEHICLES, 2020 Odyssey and 2018 Accord Hybrid VINs were added. VIN ranges were updated throughout the rest of the list.

## SYMPTOM

There is a whining, squeak, or squeal type noise coming from the driver's seat frame when adjusting the seat.

## POSSIBLE CAUSE

There is insufficient grease applied to the Up-Down Motor nylon gear.

## CORRECTIVE ACTION

Apply grease to the Up-Down Motor nylon gear.

## REQUIRED MATERIALS

Part Name	Part Number	Quantity
MULTEMP SH-U Grease (1 container repairs 12 vehicles)	08798-9066	1

## TOOL INFORMATION

Tool Name	Tool Number	Quantity
Prying Tool	Commercially available	1

## WARRANTY CLAIM INFORMATION

The normal warranty applies.

Operation Number	Description	Flat Rate Time	Defect Code	Symptom Code	Template ID	Failed Part Number
8510B0	2018-19 Accord and 2019 Accord Hybrid Apply grease to the Up-Down Motor nylon gear.	0.3 hr	07409	03214	A21048A	81526-TVA-L11
	2018-19 CR-V Apply grease to the Up-Down Motor nylon gear.				A21048B	81526-TLA-A51
	2019 Odyssey Apply grease to the Up-Down Motor nylon gear.				A21048C	81526-THR-A83

Skill Level: Repair Technician

## INSPECTION PROCEDURE

Move the seat to the upmost position. Lower the seat without anyone sitting on it and listen for any whining, squeak or squeal noises. If any noise is heard, move on to repair procedure.

## REPAIR PROCEDURE

1. Move the driver's seat to its most forward and highest position.

Driver's seat all the way forward.

Driver's seat in the highest position.

2. Remove the driver's power seat adjustment cover using the prying tool.

DRIVER'S POWER SEAT  
ADJUSTMENT COVER

PRYING TOOL

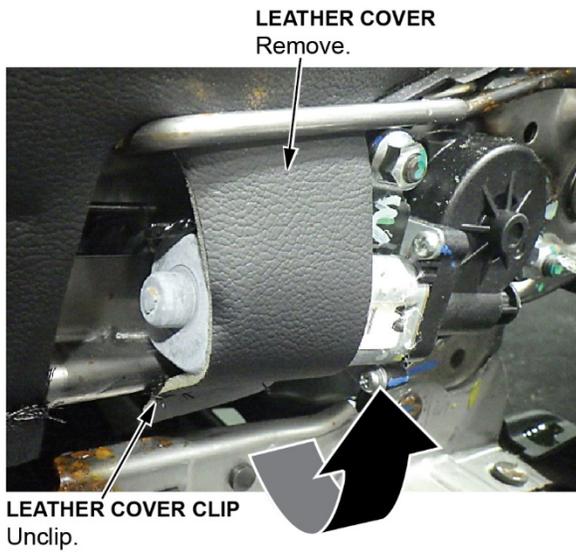

NOTE: Do not disconnect the power seat switch connectors.

SWITCH CONNECTORS  
Do not disconnect.

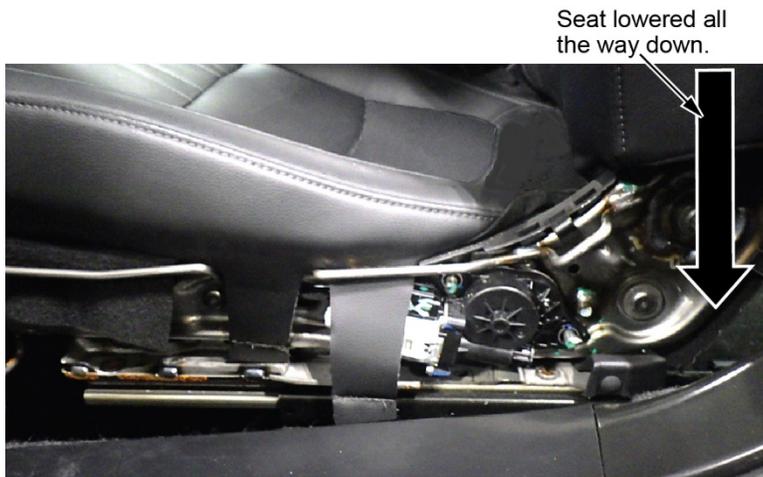

DRIVER'S POWER SEAT  
ADJUSTMENT COVER

3. Remove the leather cover by detaching it from the bottom.

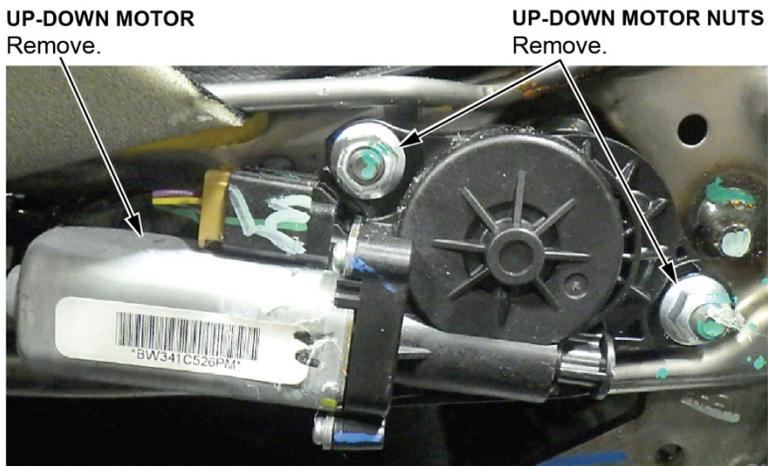

4. Using the power seat adjustment switch, move the seat down to the lowest point.

NOTE: This is important to gain access to the nylon gear.

5. Remove the Up-Down Motor nuts.

6. Remove the Up-Down Motor using the prying tool.

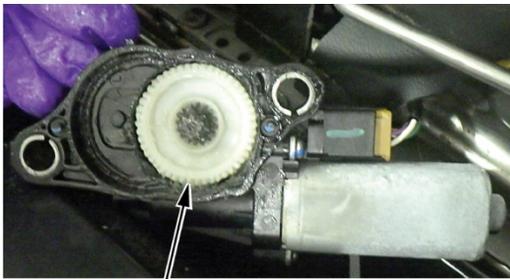

NOTE: Before removing the Up-Down Motor, move the seat down to the lowest point.

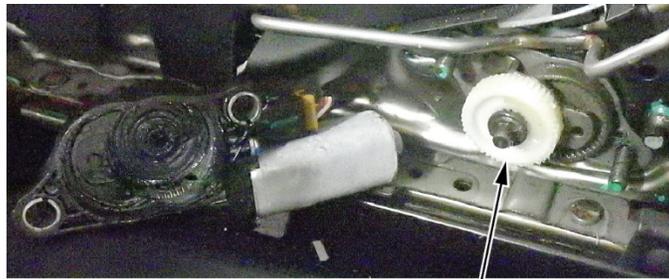

UP-DOWN MOTOR

PRYING TOOL

NOTE: When removing the Up-Down Motor, the nylon gear may come out with the motor or stay on the seat frame.

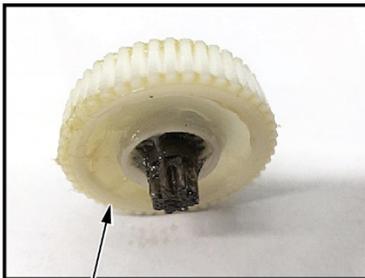

NYLON GEAR ON  
UP-DOWN MOTOR

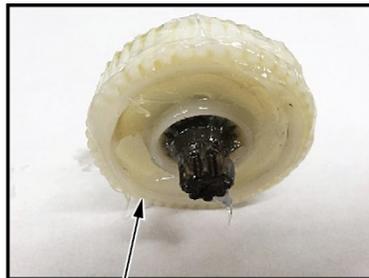

NYLON GEAR ON  
SEAT FRAME

7. Remove the nylon gear and apply a layer of grease.

NOTE: Grease must be applied evenly to both metal and nylon teeth.

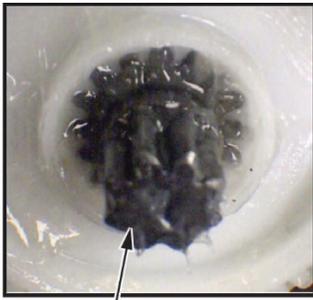

NYLON GEAR BEFORE  
GREASE IS APPLIED

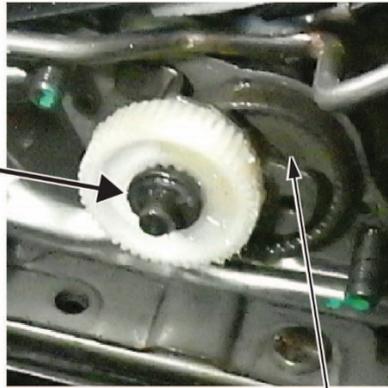

NYLON GEAR AFTER  
GREASE IS APPLIED TO  
METAL AND NYLON TEETH

8. Install the nylon gear to the seat frame.

NOTE: The metal teeth of the nylon gear must be aligned with the seat frame teeth when reinstalling. The nylon gear should be flush with the frame.

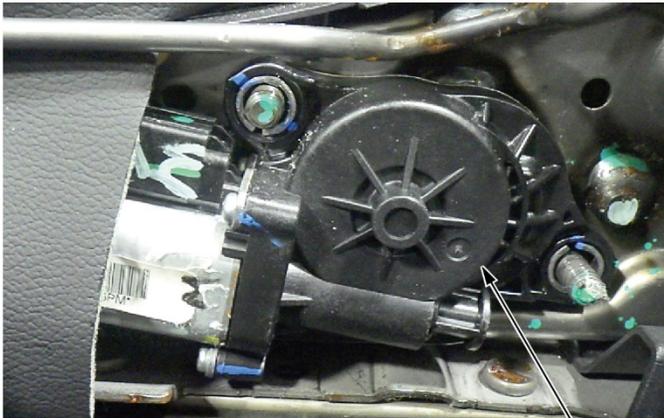

NYLON GEAR METAL  
TEETH

SEAT FRAME

9. Install the Up-Down Motor to the seat frame.

NOTE: Install slowly to make sure the gears fit together.

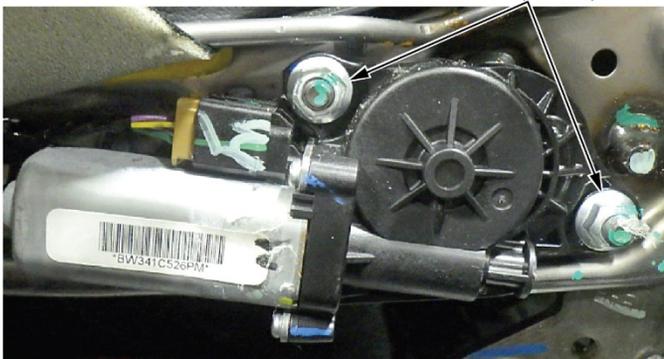

UP-DOWN MOTOR

10. Torque both nuts to **19 N·m (14 lb-ft)**.

NOTE: Do not overtighten nuts.

UP-DOWN MOTOR NUTS  
19 N·m (14 lb-ft)

11. Operate the seat to confirm proper function, and that the noise is not present.

12. Install all removed parts in the reverse order.

END
