CAL FTL 60-004

Subject: P4 Cab to Mirror Line of Sight

Make: Freightliner
Model: New Cascadia
Model Years Affected: 2019-2020
Build Date Range: Not Available

Dear Bill/Chris/Eric,

Thank you for your time on Monday. As discussed in our call, after further consultation with our Compliance-Legal and Product Engineering Teams, there is no regulation in the US or Canada specifying visibility requirements from the drivers seat regarding the region around the A-pillar or around the rear-view mirror, and there is no non-compliance issue with our P4 cab to mirror visibility line of sight.

As noted, DTNA visual sight lines from the cab are optimized in conjunction with many other design aspects, such as safety, crash performance, visual clearance of the A-Pillar and over the hood, and believe our overall visibility from the cab is benchmark in the industry.

If you have any questions, please do not hesitate to contact us.

Thank you,

Paul
