Product Change Notice - Inner extrusion for AquaShed baggage doors

Dear Valued Customer:

Please be advised to alleviate a material shortage and to improve production processes, Lippert intends to use the same inner extrusion on the AquaShed baggage doors as the 07 series baggage door.

There is a material shortage for the inner extrusion on the Aqua Shed baggage doors. Lippert concluded that the 07 inner extrusion would work for the AquaShed door, as the 07 inner extrusion is designed to better allow bending and wrapping.

The AquaShed outside extrusion will remain the same.

The extrusion change has been tested and approved by Lippert as equal to the current extrusion.

There is no change in fit, function or installation of the baggage door with the new inside extrusion. There is no part number change for the door and no price change. The change is expected to start late July.

AquaShed series with 07 series-style inner extrusion

AquaShed series outer extrusion

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,
