

New Release

TBB is pleased to announce that you can now order Insta-Chain automatic snow and ice chains on the HDX and EFX products. These new options will reduce the current number of configuration constraints that exist with our current offerings. You will no longer be required to order a G code to have automatic chains with an air suspension. The only remaining constraint will be chains with a retarder transmission. All other chain options will be removed from the databook. Orders in the backlog with other chain offerings will be produced as ordered.

Features and Benefits

- Reduced delivery time on vehicles with air suspension and chains
- Fewer configuration constraints
- Chains can be deployed at low speeds without stopping the vehicle
- Increased traction in snow and ice conditions

Ordering

Change orders for vehicles already committed in the backlog will be considered on a case by case basis depending on part availability. Contact Justin Bullins for any additional questions.

Option	Description	Model
C236503000	AUTOMATIC SNOW AND ICE CHAINS EFX	EFX
C236603000	AUTOMATIC SNOW AND ICE CHAINS HDX	HDX
