

New Release

Effective 5/7/21, we will no longer offer incandescent skirt-mounted light options on new orders for our Saf-T-Liner C2 and Saf-T-Liner HDX and EFX products. Improved quality of the LED light compared to the incandescent light along with the growing market trend towards LED are the key drivers for this decision. This move also reduces product complexity and increases expected LED volumes which support our product cost position and allows for list price reductions of the skirt mounted LED light options.

SKIRT MOUNTED LED LIGHT vs. INCANDSCENT LIGHT

All changes are shown in the table below.

Benefits

- Improved quality and less maintenance
- Reduced production complexity
- Increased volumes for LED and improved cost position / option list price reduction
- Matches industry trend towards LED

For questions regarding this announcement, please contact Jason Austin at jason.austin@daimler.com
