

New Release

New Saf-T-Liner C2 orders received on or after 5/17/21 that are equipped with the Cummins B6.7 diesel engine will now include stainless steel charge air cooler pipes. This change to stainless steel pipes provides another addition of corrosion resistance features for our Saf-T-Liner C2 product. The stainless steel pipe will not be available for existing orders in our backlog due to material availability.

Detroit DD5 is not in scope for this change as rubber Charge Air Cooler Pipes are already released for this application. A separate project that would introduce this change for our Transit products is in progress.

Features and Benefits

Additional corrosion resistance

Ordering

Option FL-261-009 (\$0 price) will be required and included when a Cummins B6.7 diesel engine selection is made on new Saf-T-Liner C2 orders only effective 5/17/21.
