From: Richard Kenton, Technical Director
Dan Schwartz, Service Area Manager

Dear Dealers,

We would like to provide information regarding the layout of the Fuel Tank Breather and Drain Hoses on the Multistrada V4. This information also outlines the precautions which must be observed for correct positioning of the hoses in case of maintenance and/or repair on the motorcycle.

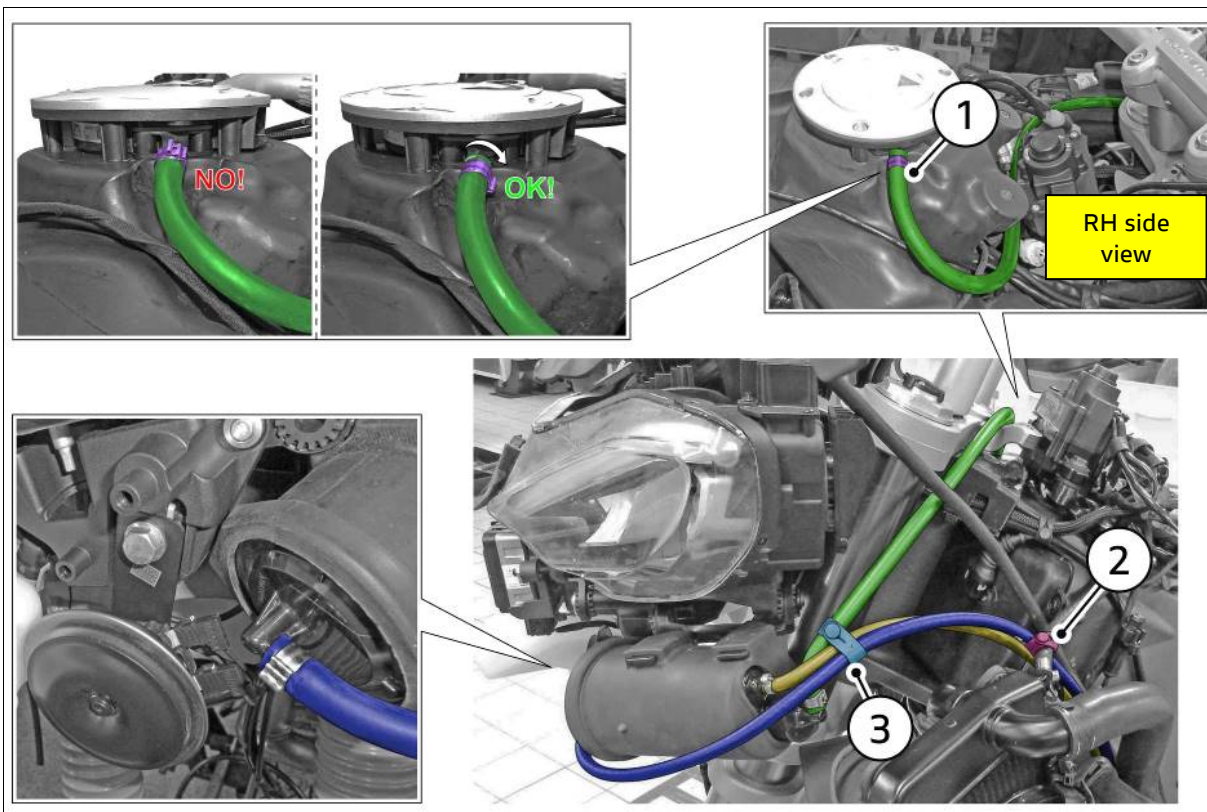

Layout of Fuel Tank Breather and Drain Hoses Multistrada V4 Model Year 2021 (all model versions) Service Repair Bulletin SRV-SRB-21-051

Key:

Hose color	Description
Green Hose	Fuel Tank/Canister Filter Breather Hose
Violet Hose	Fuel Tank Drain Hose
Yellow Hose	Hose from Canister to Purge Valve
Blue Hose	Canister Filter Breather Hose
Light blue Hose	Airbox Drain Hose
Orange Hose	Fuel Tank Drain and Canister Breather Hose

The correct layout of the above hoses and precautions to be observed are shown below:

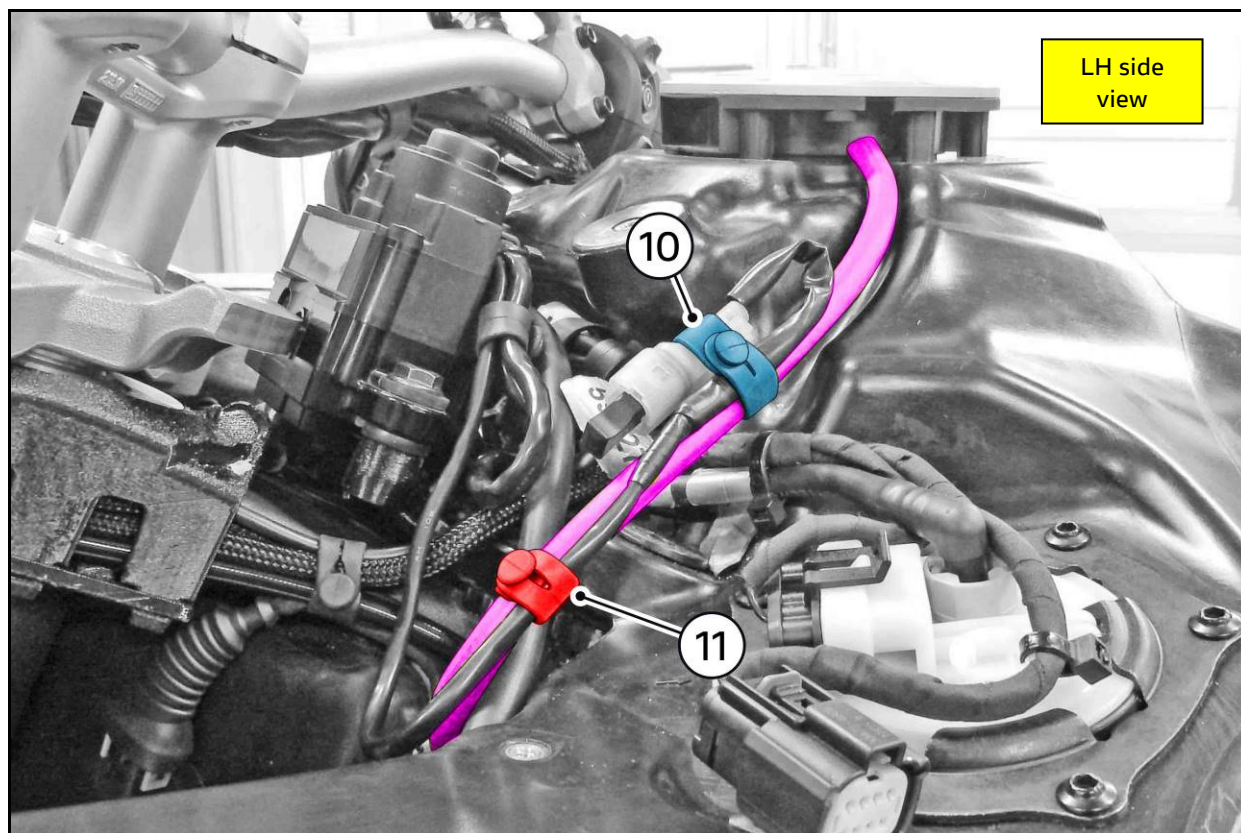

- **NORMA Clamp (1):** after tightening the clamp, turn it with the locking device facing downwards, as indicated by the white arrow.
- **L.39 Button Tie (2):** connection tie for canister filter breather hose and upper hose for joining water radiators.
- **L.62 Button Tie (3):** connection tie for canister filter breather hose, hose from purge valve to canister filter, and breather hose from fuel tank to canister filter.
