Version 2

WMG1 Workshop Campaign – Retrofitting smartphone compartment with wireless charging

Important Information:

- Please note that this PPN information serves as preliminary information.
- At present, no statement can be made about the availability of parts. Together with our suppliers, we are working at high priority to procure the required capacities of components. As soon as these are available and thus a supply of the telephone console (smartphone compartment with wireless charging) is possible, we will inform you immediately. In the meantime, please refrain from requests regarding the availability of parts.
- The Technical Information and the corresponding customer letter will be published at a later date.

- The warranty check date for this campaign has been adapted in order to ensure that Certified Pre-Owned Warranty can be registered even with open campaign.
- For the initial scope 1 (dummy), no PQIS-jobs may be created.
- The creation of jobs as well as the invoicing the campaign is only possible with the availability of the remedial measure.
- The associated customer pre-delivery disclosure regarding deviating product build should be provided to the customer at delivery.

Overview

Due to worldwide semiconductor shortages experienced by some suppliers, the affected vehicles were built without a telephone console (smartphone compartment with wireless charging).

As a result, the smartphone can only be charged via a USB port and not wirelessly.

For this reason, the telephone console must be retrofitted on the affected vehicles.

Please arrange for this measure to be carried out immediately on the affected vehicles in your market responsibility area with parts availability.

Model type	Panamera (971), Taycan (Y1A/Y1B)
Model year	2021-2022
Number of affected vehicles	TBD*

*Please note that vehicles from current production are added to this campaign on a weekly basis. The manufacturing period and the number of affected vehicles may still change due to volatile availability of the control units.
