Product Improvement Notice - Inner hinge extrusion redesigned for baggage doors

Dear Valued Customer:

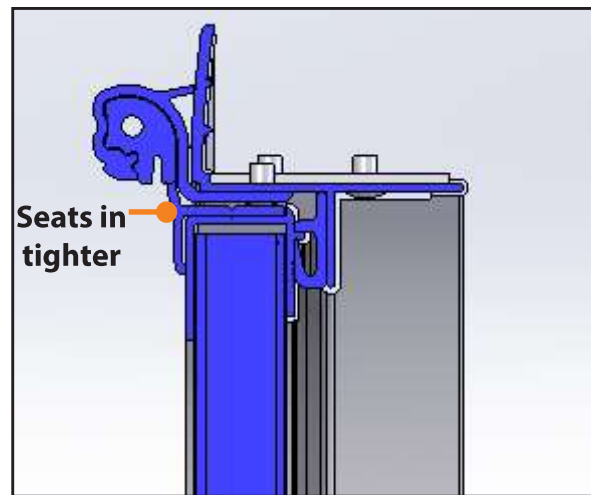

Please be advised Lippert has redesigned the inner hinge extrusion on its baggage doors to improve the door's reveal near the hinge.

The new inner hinge extrusion sets in the outer extrusion better to make a tighter reveal for the door. There is no change in installation or operation with the improved hinge redesign. There is no part number change and no price change.

The change is expected to begin in early August.

**Current inner hinge extrusion
with outer extrusion.**

**New inner hinge extrusion with
outer extrusion.**

With current inner hinge

With new inner hinge

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Scott McKinnon
