Complaint

The bike does not shut down with a short press of the keyless ride button.

The Keyless Ride button must be pressed for several seconds to shut the bike down.

Cause

Fault memories are entered for the ABS control unit for front/rear wheel speed sensors.

For safety reasons, the Keyless Ride control unit does not shut the bike off, as it is not sure if the vehicle is still moving.

Measure

DO NOT replace the Keyless Ride control unit!!!!

Work through the e fault memory for the ABS control unit

(i.e. Check/ replace front/rear wheel speed sensors)

Complaint

Fault location	Fault type	Fault place
Switching ignition on / off	Switch off not possible	

Cause

#	Fault location	Fault type	Fault place
1	51/25 Ignition - steering lock
