## **WMHO Workshop campaign - Re-programming various control units**

## Overview

During a data analysis of hardware and software versions and their combinations in vehicles in the field, it was discovered that the affected vehicles display a discrepancy in terms of the defined target version. As a result, the consistency of the combination of hardware and software versions defined and approved by Porsche is not ensured.

Therefore, the software must be updated to the current combination in use in the affected vehicles.

The instructions for re-programming the various control units can be found here in the [AfterSales Document Database](#)

<b>Model type</b>	Taycan (Y1A)
<b>Model year</b>	2020 - 2021
<b>Number</b>	257

## Required software

PIWIS Tester 3 test software version	40.450.020 (or higher)
--------------------------------------	------------------------
