Product Change Notice - New supplier for hydraulic pressure switches

Dear Valued Customer:

Please be advised, Lippert intends to switch suppliers for pressure switches used in hydraulic leveling.

The current pressure switch (PN 142927) is a two-wire mechanical switch by Nason. The new supplier, Anfield, supplies a solid state, three-wire switch (2020109583). The third wire on the new switch must be connected to 12V power. That third wire will be wired by Lippert prior to shipment to the OEM customer.

A benefit to adding the solid-state Anfield switch is eliminating false alarms on "jack down" warning lights by lowering the falling pressure threshold to 500 psi.

There is no change in installation, operation or function with the new Anfield switch. There is no price change for the new pressure switch. The change will be made starting XXXX.

Current Nason Pressure Switch

New Anfield Pressure Switch

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle

VP of RV Sales
