

01-21-08 - Update Programming, DTCs P0300-P0304 stored in the Release date: Engine/Motor Control Module -J623-, Manual Trans. Only

## Condition

Applicable Ver	nicles				
Model(s)	Year	Eng. Code	Trans. Code	VIN Range From	VIN Range To
Golf R	2017	2.0L (CYFB)	6 Speed Manual (02Q)	All	All

Revision Table		-	
Instance Number	Published Date	Version Number	Reason For Update
2064411/1	9/16/21	01-21-08	Original publication.

## I Note:

#### This bulletin only applies to vehicles with a manual transmission.

One or more of the following fault codes may be stored in the Engine/Motor Control Module -J623- Fault Memory:

DTC	Description	
P0300	Random/Multiple Cylinder Misfire Detected	
P0301	Cyl.1 Misfire Detected	
P0302	Cyl.2 Misfire Detected	
P0303	Cyl.3 Misfire Detected	
P0304	Cyl.4 Misfire Detected	

## **I** Note:

**DO NOT** diagnose or replace any components due to faults P0300, P0301, P0302, P0303, P0304 **before** performing the update function as explained in this bulletin.

01-21-08 - Update Programming, DTCs P0300-P0304 stored in the Engine/Motor Control Module -J623-, Manual Trans. Only

Release date: 9/16/2021

## **Technical Background**

Current Engine/Motor Control Module -J623- software causing erroneous faults.

### **Production Solution**

Vehicle no longer in production.

#### Service

#### Update-Programming Procedure:

# i Tip:

To Update-Programming using SVM, **review and follow** instructions in **Technical Bulletin Instance 2014603** "Software Version Management".

The SVM Process must be completed in its entirety so the database receives the update confirmation response. A warranty claim may not be reimbursed if there is no confirmation response to support the claim.

# I Note:

Prior to launching the ODIS service diagnostic applications and starting control module update process, confirm tester screen saver and power settings in accordance with Special Tools and Equipment - Service Information Circular # VVT-12-02. Failure to do so may result in the tester entering power save mode during data transfer, and subsequent control module failure.

When using a VAS 6150/X or 6160/X tester in conjunction with a VAS 5054A wireless transmitter head for a flash procedure, always connect a USB cable between the transmitter head and the tester. Using a diagnostic interface with a wireless connection (Bluetooth or WLAN Infrastructure) is prohibited. Failure to do so may lead to errors during the flash procedure.

VAS tools must only be used with their power adapters plugged in. Under no circumstances should they be used on battery power alone during the programming procedure.

<u>Critical Warning</u>: The Midtronics battery charger <u>must</u> be connected to the vehicle battery for the duration of the programming, to ensure the battery state of charge remains above 12.5 volts during the update process. If the battery drops below 12.5 volts, the programming could fail which may result in damage to the control module. Control modules damaged by inadequate voltage will not be covered under the warranty policy. The technician should verify the vehicle voltage prior to starting the update process, and should monitor the voltage for the duration of the update.

# 

Radiator Fan(s) may cycle ON high speed during the Update Process! There is a risk that personal injury may result if contact is made with spinning fan blades.

Keep hands and all objects away from Radiator Fan(s) during Update Process!

• Update the Engine/Motor Control Module -J623- using the SVM Unit code as listed in the table below:

Model	Engine	Old Software Part No.	Old Software Version	New Software Part No.	New Software Version (or higher)	SVM Unit Code
			0001			
	Golf R CYFB	8V0906259K	0002	8V0906259T	0002	465E
GOILK			0003			
		8V0906259T	0001			

The procedure can be found in GFF under Functions/ Component Selection, Software Version Management, Adapting Software.

# iTip:

The SVM Process must be completed in its entirety so the database receives the update confirmation response. A warranty claim may not be reimbursed if there is no confirmation response to support the claim or action is carried out that is not explicitly stated in the Technical Bulletin.

Ensure attached ECM/TCM Tuning Form has been completed and signed by customer as required in SVM Technical Bulletin Instance 2014603.

## OWNER INFORMATION ABOUT CONTROL MODULE TUNING\* ACKNOWLEDGEMENT AND AUTHORIZATION FOR REPROGRAMMING (REFLASHING) OF CONTROL MODULE(S)

\*) "TUNING" is described as the addition of or modification of any component which causes a Volkswagen vehicle to perform outside the normal parameters and specifications approved by Volkswagen Group of America / Volkswagen Group Canada.

Date:	
Dealer Number:	_
Vehicle Identification Number:_	
Repair Order Number:	

Dealer stamp

\_\_\_\_\_, owner or driver of the above identified Volkswagen, confirm:

"Tuning" as described above (especially power increasing modifications) has NOT been performed on my vehicle.

"Tuning" as described above has been performed on my vehicle and the following components were modified or installed:

<u>TUNING was performed by (Please provide Company name and telephone number, if you wish us to contact them):</u>

I understand that if my Control Module is determined to have been tuned, any damage caused by the tuning of the Control Module (including adverse emissions consequences) will not be covered by VWGoA / VGC warranties.

I am permitting an authorized Volkswagen Dealer to reflash (update) my Control Module, and by doing so, I understand that this process will automatically overwrite (destroy) and permanently delete any tuning program that was previously installed on the Control Module of my Volkswagen vehicle.

By signing below, I fully acknowledge and understand that the tuning program will not be restored and VWGoA / VGC, will not be liable in any way for the loss of tuning data.
