

Detroit DD5 engines have introduced improved performance in both fuel efficiency and active regens. Their efficient technology has made them ideal products for many customers. We have heard your feedback regarding concerns for cabin heat and driver comfort in cold climate areas and we are continuing to work with Detroit to identify and offer solutions to help address your customers' needs.

Thomas Built Buses recommends that Saf-T-Liner C2 orders configured with a Detroit diesel engine also include Webasto fuel burning heaters in the cold climate domiciles listed below. For new C2 orders received after 9/26/21 with Detroit DD5 engines but configured without a Webasto Fuel Burning heater selection, we will apply option A000000189 – OPTIONAL CAB HEAT NOT PRESENT. The purpose of this additional sales code is to reflect and highlight your understanding of our recommendation as well as you electing, with your customer, to opt out of a factory installed Webasto Fuel Burning Heater selection.

Option	Description	Status
FL-141-031	WEBASTO 17K BTU COOLANT HEATER	Available
FL-141-806	KIT CUST FURN 45K WATT HTR	Available
FL-141-056	WEBASTO SCHOLASTIC PRO 90 HEAT	Coming Soon!
FL-141-998	NO COOLANT HEATER - GAS/DIESEL	Available
A000000189	OPTIONAL CAB HEAT NOT PRESENT	Required when the combination of DD5 engine and FL-141-998 NO COOLANT HEATER occurs on a vehicle configured for these cold climate domiciles.
