

To further our efforts to simplify our product options and improve our manufacturing efficiency, we are immediately discontinuing our paint sales codes for BASF E180WM008 TBB WHITE. This includes front and rear bumper paint options, cab options, guard rail paint options, solid color options and paint design options that require TBB White. We will continue to offer E180WM002A GM WHITE as our optional white paint selection for front and rear bumpers, cab, guard rails, solid body and paint design configurations. Orders currently committed with TBB White selections will be painted as configured. GM White will be the only available white paint offered on our Saf-T-Liner C2, EFX and HDX products. GM White will also be available for our Minotour products. We will also continue to offer FORD WHITE paint for Minotour's built on Ford White chassis only.

E180WM008 TBB WHITE will continue to be available directly from BASF for your customers' service needs.
