

Model: Aprilia RSV4 1100 E5, Tuono V4 1100 E5

Subject: Availability of instrument panel calibration update

Dear Dealer / Service Centre,

We inform you that a software update, relating to the calibration of the instrument panel. of the models in question, is available by downloading it from the P.A.D.S. diagnostic tool (update the instrument to the latest version available).

The above operation is to be understood as included in the periodic maintenance activity to be carried out at the same time as the other activities planned at the services, during pre-delivery or at the first possible arrival in the Workshop for those in circulation.

The main contents of the available update are:

- Update of the calculation algorithms.

Detailed summary table

Model	Version	ECU Internal Code	New Map
RSV4 1100 E5	ALL		60-UD-84008.104
TUONOV4 1100 E5	ALL		60-UD-84008.104

IMPORTANT

During the reprogramming phase, the calibration 60-UD-84008.104.CUT is displayed in the diagnosis tool menu (since only the application part is updated and not the graphics);

Once the update has been completed successfully,

- the calibration in the ECU data is displayed as 60-UD-84008.104;
- perform a key off / key on;
- access the menus of the vehicle ECU and delete any errors.

Our Technical Assistance Service is in any case at your disposal to provide you with any information and support you may deem necessary through the Help Desk service.
