RE: 2017-2021 CR-V Oil Residue on A/C Discharge Hose & Suction Hose

This message is solely directed to Honda dealership personnel; please handle accordingly.
Print this iN message and provide a copy to the Shop Foreman and all Service Advisors.

Noticing Oil residue on A/C Discharge Hose and Suction Hose? Read This!

Please make note of the "ServiceNews article A21090A- Oil Residue on the A/C Discharge Hose and Suction Hose?"

Oil residue is not an indication that the hoses are leaking refrigerant.
Remember to always refer to the [Honda AC Performance Test \(Interactive\)](#) guide, to help you determine if the A/C system is operating within specification.
