

(Back Office Only) Mack Chassis - Granite Models (GR) - Body Raised Out Of Position Message Not Displaying In Driver Information Display - INT-GEN2

> **Internal Content**

Early GR models had to be ordered with the Order Code DIL-BOOP for the parameter RPO (Popup Enable fo BBM) to be enabled.

If this function is needed and is not currently enabled, run **Accessory Kit 85154155** and program as required.

Parameters changed by the accessory kit:

Parameter	Description	Value
RPO	Popup Enable for BBM	1
RTX	Body Builder Alert Feature, Enable	1
RVD	Body Builder Out of Position Popup, Enable	1
