

Volvo Chassis - Enable The Fault Code, Diagnostic Trouble Code (DTC) Screen (Menu) In The Instrument Cluster (IC, Dash); Fault Code Screen (Menu) Missing From Driver Information Display (DID); Read Fault Codes (DTCs) In Cluster

> Internal Content

The Fault Diagnostics menu can be enabled or disabled by parameter setting. Follow the correct set of instructions below:

For Pre-OBD Chassis (Pre-US13 emissions, 9-pin diagnostic connector):

- An eService case will need to be opened. Software changes must be made in Central Systems to enable the menu.

For OBDII Chassis (US13 emissions and newer, 16-pin diagnostic connector):

- Run Accessory Kit 85142530
 - The Instrument Cluster (MID 140) will need to be programmed following Accessory Kit entry.
 -
 - **NOTE:** If the Accessory Kit will not run
 - An eService case will need to be opened so changes can be made to Central Systems.
