

INDIAN MOTORCYCLE Stage 1 Accessory Intake

Polaris has identified an issue with a population of the 2881779-156 and 2881779-521 Air Intake Kits. These kits include Airbox Gasket 5634512 instead of the correct Airbox Gasket 5633638. The two gaskets can be visually distinguished as described below:

Gasket 5633638 (Universal fit gasket)- Metal flange has no raised mounting ribs, polished silver color.

Gasket 5634512 (MY21 newer gasket)- Metal flange has 2 raised ribs on opposite sides from each other, black or polished silver color.

MY20 and Older Heavyweight Air-cooled Motorcycles

- *Confirm if your kit has the correct gasket (PN 5633638) as described above.*
- *If not, the original OEM gasket can be re-used after the gasket has been inspected and confirmed to not have any damage from disassembly. Continue installing the kit per accessory instructions.*
- *A new gasket (PN 5633638) should be ordered if the OEM gasket shows any signs of damage.*

MY21 and Newer Heavyweight Air-cooled Motorcycles

Both 5633638 and 5634512 are acceptable.
