Part Numbers

Description	Part No.
Dipstick, chrome	37065-06A
O-ring, chrome dipstick	11132A
Dipstick, black	62700291
O-ring, composite dipstick	11900179

Required Dealer Action

Dipstick variations are identifiable by their color. Old dipstick has a chrome finish and is cast of metal. **New** dipstick has a black finish and is made of a composite material. **New** composite dipstick can also be identified by extra webbing just under the threads of the dipstick.

O-rings are unique to the specific dipstick and are not interchangeable. Either dipstick can be used on any Milwaukee-Eight powertrain. Any retrofit will not be covered under warranty.

The two dipstick variations and their respective O-rings are sold individually only. A kit will not be created for either variation.

In the interest of preserving customer safety and satisfaction, always check for outstanding recalls whenever any motorcycle is brought into your dealership for either maintenance or service.
