Product Substitution Notice - Coating for 3.5K U-bolts

Dear Valued Customer:

Please be advised, to help ensure continuous product supply, Lippert intends to add a second coating option for 3.5K U-bolts.

The current coating is a yellow dichromate. The intended substitution is clear zinc with a sealer, which has equal or better corrosion resistance.

The coating will change as availability dictates to keep up with product demand. There is no change in fit, function or installation with the coating change. There is no price change and no part number change.

The clear zinc coating will be utilized as needed effective immediately and is expected to continue through first quarter 2022.

If you have any questions, please feel free to call me directly or your LCI representative. We value and appreciate your business and partnership.

Sincerely,

Mason Ogle
