

## VOLKSWAGEN DEALERSHIP COMMUNICATION

Date: December 09, 2021

To: Dealer Principal, Sales Manager, Service Manager, Parts Manager and Warranty Administrator

Subject: Upcoming Update 24HV – Engine Control Module Software Update – (FED\_EMS)  
2022 MY Volkswagen Taos

### IMPORTANT NOTICE TO DEALERS - FOR IMMEDIATE DISTRIBUTION

This is to inform you of an upcoming Update that will be visible in Elsa and ServiceNet on or about December 09, 2021.

Please refer to the Elsa campaign/action screen for confirmation of whether the Update applies to each specific vehicle, and look to Elsa and ServiceNet for additional information and complete repair instructions.

Consistent with general Volkswagen corporate policy governing Updates, Volkswagen is not notifying consumers. (Updates differ from recalls and service actions; consumers are notified in writing of recalls and service actions.) Each vehicle should be completed when it is in to the dealer for maintenance or any other service visit. Dealer stock vehicles **cannot, however, be delivered** to consumers until the Update is completed.

To identify any vehicles in your inventory that are affected by this Update, please run the “New and CPO Inventory Open Campaign/Action Listing” report from the OMD Web system.

Dealers must ensure that every affected vehicle gets the update before delivery to consumers. Your effort is integral in reaching the highest quality expectations of Volkswagen customers.

If you have any questions or require additional assistance, please contact Warranty.

Volkswagen Customer Protection

Attachment: Update Data Sheet (1)

## UPDATE DATA SHEET

<b>SAGA CODE</b>		<b>24HV</b>
<b>MARKET(S)</b>		United States and Canada
<b>AFFECTED VEHICLES</b>		Certain 2022 MY Volkswagen Taos Check your daily campaign open inventory report or OMD for affected vehicles in your inventory.
