SUBJECT:

PANORAMIC SUNROOF RESET PROCEDURE

This Pitstop provides information to 'reset' the panoramic sunroof operation logic on some 2017-2020MY Cadenza (YG) vehicles, where the panoramic sunroof operation will not relearn. Follow the procedure outlined below to erase and reset the logic of the panoramic sunroof, after parts or complete panoramic roof replacement has been performed and other reset options have failed.

Reset Procedure:

- With the ignition OFF, open the driver's door.
- Press and hold the sunroof Open switch and turn the ignition to the ON position.
(Continue to hold the **Open** switch for at least four (4) seconds)
- Release the **Open** switch.

Press the **Close** switch four (4) times.

(This will erase the previous initialization and reset the panoramic sunroof operation)

- Verify normal 'open/close' operation of the panoramic sunroof.
