

Technical Service Bulletin

Mazda North American Operations
Irvine, CA 92618-2922

Subject: COOLANT LEAKS AT CYLINDER HEAD	Bulletin No.: 01-013/21
	Last Issued : 12/02/2021

BULLETIN NOTES

This bulletin supersedes the previously issued bulletin(s) listed below. The changes are noted in Red text.

Previous TSBs:	Date(s) Issued:
01-013/21	10/15/21

APPLICABLE MODEL(S)/VINS

US Spec.:

2019-2020 CX-5 SKYACTIV-G 2.5T vehicles with VINs lower than JM3KF*****830243 (produced before Jun. 9, 2020)
2016-2020 CX-9 SKYACTIV-G 2.5T vehicles with VINs lower than JM3TC*****422801 (produced before Jun. 9, 2020)
2018-2020 Mazda6 SKYACTIV-G 2.5T vehicles with VINs lower than JM1GL*****523967 (produced before Mar. 25, 2020)

Mexico Spec.:

2019-2020 Mazda6 SKYACTIV-G 2.5T vehicles with VINs lower than JM1GL*****523672 (produced before Mar. 21, 2020)

DESCRIPTION

Some vehicles may have coolant leaks at the cylinder head around the exhaust manifold (as shown below). There may be cracks at the stud bolt hole (1) or at the outside of the exhaust manifold (2).

CONSUMER NOTICE: The information and instructions in this bulletin are intended for use by skilled technicians. Mazda technicians utilize the proper tools/ equipment and take training to correctly and safely maintain Mazda vehicles. These instructions should not be performed by "do-it-yourselfers." Customers should not assume this bulletin applies to their vehicle or that their vehicle will develop the described concern. To determine if the information applies, customers should contact their nearest authorized Mazda dealership. Mazda North American Operations reserves the right to alter the specifications and contents of this bulletin without obligation or advance notice. All rights reserved. No part of this bulletin may be reproduced in any form or by any means, electronic or mechanical---including photocopying and recording and the use of any kind of information storage and retrieval system ---without permission in writing.

Cracks may be caused by:

- Deformation of the exhaust manifold during usage causing unexpected force to certain areas of the cylinder head.
- Residual stress generated during production in the cylinder head material may be greater than expected. The external force from the exhaust system when driving over bumps may cause unexpected force to certain areas of the cylinder head.

To eliminate this concern, the design of the exhaust manifold gasket and the cylinder head has been modified to reduce the force on the cylinder head.

Customers having this concern should have their vehicle repaired using the following repair procedure.

REPAIR PROCEDURE

Page 2 of 13

CONSUMER NOTICE: The information and instructions in this bulletin are intended for use by skilled technicians. Mazda technicians utilize the proper tools/ equipment and take training to correctly and safely maintain Mazda vehicles. These instructions should not be performed by "do-it-yourselfers." Customers should not assume this bulletin applies to their vehicle or that their vehicle will develop the described concern. To determine if the information applies, customers should contact their nearest authorized Mazda dealership. Mazda North American Operations reserves the right to alter the specifications and contents of this bulletin without obligation or advance notice. All rights reserved. No part of this bulletin may be reproduced in any form or by any means, electronic or mechanical---including photocopying and recording and the use of any kind of information storage and retrieval system ---without permission in writing.

1. Verify the customer concern.
2. Confirm the crack(s) and coolant leak(s) are located at the area(s) shown in the "Description" above:
 - If the coolant leaks are coming from other than the cylinder head itself, this Service Information is not applicable.
 Diagnose the leaks according to the instructions on MGSS online.
 - If the coolant leaks are coming from the area(s) shown in the "Description" above, proceed to Step 3.
3. Inspect for DTC P111A:
 - If DTC P111A is stored in memory, engine overheating is suspected. This Service Information is not applicable.
 Diagnose the cause and repair, replacing the partial engine according to MGSS online. **Contact MASH for partial engine approval.**
 - If DTC P111A is not stored in memory, proceed to Step 4.
4. Drain some engine oil into a container.
5. Inspect the color of the engine oil. Is it a milky light brown color indicating coolant is mixed in with it?
 - If Yes, this Service Information is not applicable. **Contact MASH for partial engine approval.**
 - If No, proceed to Step 6.
6. Replace the cylinder head assembly with a new one using a modified exhaust manifold gasket according to the instructions on MGSS online:

NOTE: MASH approval is NOT required for cylinder head assembly replacement.

 - CX-5: CYLINDER HEAD GASKET REPLACEMENT [SKYACTIV-G 2.5T]
 - CX-9: CYLINDER HEAD GASKET REPLACEMENT [SKYACTIV-G 2.5T]
 - Mazda6: CYLINDER HEAD GASKET REPLACEMENT [SKYACTIV-G 2.5T]

NOTE: Reuse the water outlet, fuel distributor, fuel injectors, OCV oil filter, rocker arms, HLA, CMP sensors and engine hanger brackets.
7. Perform "Engine Oil Data Reset" according to the instructions on MGSS online:
 - CX-5: ENGINE OIL DATA RESET [SKYACTIV-G 2.5T]
 - CX-9: ENGINE OIL DATA RESET [SKYACTIV-G 2.5T]
 - Mazda6: ENGINE OIL DATA RESET [SKYACTIV-G 2.5T]

8. Verify the repair.
