

Fuel Tank Strap Insulator Design Update; Fuel Tank Strap Appearance Changed

> Internal Content

A recent design update has changed the fuel tank strap insulator from a ribbed design to a smooth design. See the picture bellow.

Live UI

The image on the left is the original design with a ribbed surface and the image on the right is the updated design with a smooth surface.

This design update applies to all Mack and Volvo units configured with round fuel tanks

Below is a list of original strap insulator part numbers along with their superseded part numbers.
