**Subject:** New map for updating engine control unit

Dear Dealer / Service Centre,

We hereby inform you that a new instrument cluster calibration is available for download from the P.A.D.S. diagnostic tool is now available for downloading with the P.A.D.S. diagnostic tool (which must be updated to the most recent version available). The above operation is to be understood as included in the periodic maintenance activity to be carried out at the same time as the other scheduled service coupon activities, during pre-delivery or at the first useful arrival in the Workshop for those in circulation.

The new software introduces the following functional improvement:

- Improves cold engine starts
