Service Campaign 451 M156 M157 M161 V8 MY21: ECM Sw Update

DATA: December 17, 2021

Maserati Quattroporte (M156), Ghibli (M157) and Levante (M161) V8 MY21, are involved in a Service Campaign to update the ECM Software.

This update is necessary because, due to an improper calibration, the car could set a DTC P008A fault code. This code is erroneously set and it is not an indication of some concern on the low pressure fuel system.

In case of DTC P008A, please perform this campaign and then test the vehicle before proceeding with any further diagnosis.

Technical Procedure

1. Check in ModisCS+ to see if the vehicle is involved in this campaign and whether it has not been previously performed.
2. Before proceeding, please ensure that the engine is off.
3. With MD EVO perform **ECM – ECU Programming**.
4. Procedure is completed.

The Sw below (or later) must be installed

Mkt	Model	F132 Old	F132 New	F151 Old	F151 New
