Customer Satisfaction Campaign No. DUB-2021-01

Dear Valued Customer:

You are receiving this notice because you purchased one of our Dress Up Bolts engine bay kits for the Toyota Supra MKV (A90/A91). Dress Up Bolts focuses on providing its customers with bolts of the highest quality. We discovered a manufacturing issue with two bolts in these engine bay kits.

What is the Problem?

We have determined that the two bolts in the Toyota Supra MKV kit used in the strut tower sold between February 2020 and July 2021 are 5 mm longer than the original equipment manufacturer (OEM) bolts. This can cause the bolt to rub the top hat of the strut tower and over time create a "clunking" sound.

What Are We Doing About the Problem?

To ensure your continued satisfaction with the Toyota Supra MKV kit, Dress Up Bolts is providing you with two new replacement bolts. For installation, please see the enclosed installation instructions.

Questions or Concerns?

If you have questions or concerns about this customer satisfaction program, please contact Dress Up Bolts:

sales@dressupbolts.com

Monday through Friday 8:30 a.m. to 5:00 p.m. EST
