SUBJECT:

Electric A/C Compressor (EAC) System Noise During Warmup and Under Load

OVERVIEW:

This bulletin serves as awareness for the operation of the electric A/C Compressor pump noise.

MODELS:

2021 (JL) Jeep Wrangler

NOTE: This bulletin applies to vehicles within the following markets/countries: North America, EMEA and APAC.

NOTE: This bulletin applies to vehicles equipped with the 2.0L I4 DOHC DI Turbo PHEV Engine (Sales Codes ECX).

DISCUSSION:

Customers may notice a small compressor pump noise from the engine compartment while the vehicle is idling and the A/C is on.

This is more noticeable and the A/C compressor is louder during warm-up and when under load.

When the A/C is turned off the noise goes away.

This is normal operation.
