Case Number: S212400002

Release Date: 02/16/2021

Symptom/Vehicle Issue: Customer Indicates Whistle Noise Coming From Dash When Driving With Recirc Mode On.

Customer Complaint/Technician Observation: The condition can be isolated when driving by turning the Recirc mode on and off. If it is determined to come and go with the Recirc button remove the windshield cowl and examine the water seal. The seal can come loose and out of place creating a wind noise when the ventilation system is restricted during Recirc mode.

Replace the water seal and reassemble.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
