Symptom/Vehicle Issue: Battery Of Uconnect Box Is Temporarily Low Popup Message

Discussion: Customers might receive a popup message of Uconnect Box Error, showing “Battery of Uconnect box is temporarily low, SOS call and related functions may be unavailable”. The popup is a warning message to the customer that the SOS call is not available due to low voltage of backup battery in the TBM module. The failure happens when the battery is drained because the vehicle has not been running for long time. The battery will be fully charged after vehicle runs for approximately 4 hours.

No repair is required for this error message. Please DO NOT replace the TBM module.
