Subject: 2009-2015 Model Year Volkswagen TDI® Clean Diesel Vehicles Registered in Minnesota Engine Codes CBEA, CJAA, CKRA, CATA, CNRB Using Biodiesel Blend Fuels

Dear Volkswagen TDI Clean Diesel Owner,

As a valued Volkswagen customer, your satisfaction is our utmost priority. Because we support the development and use of renewable fuels (such as biodiesel fuel blends) we are writing to customers who have Volkswagen TDI® Clean Diesel engine vehicles registered in the State of Minnesota in order to share some important information about using biodiesel fuel blends in these vehicles.

What is biodiesel?

Biodiesel is a domestically produced, clean-burning and renewable partial substitute for conventional (petroleum) diesel fuel.

Why is it important for me to know about biodiesel fuel blends?

Your vehicle was originally designed to run on "ULSD" - Ultra Low Sulfur Diesel No. 2 – fuel that complies with ASTM D-975 specifications and permits up to a maximum blend of 5% biodiesel (B5).

Due to new Minnesota state regulations regarding biofuels, biodiesel blends of B5 or less may not be available in Minnesota. <u>However, we want to assure you that Volkswagen will continue to honor the terms and conditions of the Volkswagen Limited Warranties that came with your vehicle.</u>

Biodiesel blends (up to B20) may be used in your Minnesota-registered TDI® Clean Diesel vehicle; however please be aware that biodiesel has characteristics that are different from other kinds of fuel, especially petroleum-based fuels.

How does biodiesel differ from ULSD diesel fuel?

Biodiesel can attract water and also deteriorate with age. Small amounts of biodiesel can get into the engine oil, but unlike petroleum diesel, it does not evaporate over time. This can cause the oil level in the engine to rise and can affect the quality of the oil.

When I use biodiesel blends in my Minnesota-registered Volkswagen TDI® Clean Diesel vehicle, what should I remember?

- Routinely check the engine oil level. A good time to do this is when you refuel, especially if you regularly do a lot of short distance or stop-and-go driving. This will help you see if the engine oil level is getting <a href="https://historycommons.org/historycommo
- If you ever notice that the engine oil level has risen or is above the
 maximum indicator, contact your authorized Volkswagen dealer or
 Volkswagen Customer CARE to schedule an oil change regardless
 of the time or mileage that has elapsed since you last had an oil
 change performed.
- Continue to follow the oil change intervals found in the maintenance booklet that came with your vehicle, and use only engine oil that expressly complies with Volkswagen quality standard VW 507 00.
- Refuel only at trusted, commercial fueling stations that are located near main highways. These stations are more likely to have "fresh" biodiesel fuels that have not aged significantly.
- When your vehicle will be in storage (or not driven) for several weeks or months, please completely fill the fuel tank. If possible, fill the tank with Ultra Low Sulfur Diesel fuel (ASTM D975 standard Grade No. 2 D S15).

Can we assist you further?

If you have additional questions about your Minnesota-registered TDI® Clean Diesel vehicle, please call or write to us at:

Volkswagen of America, Inc. Attn: Customer CARE 3800 Hamlin Road, Auburn Hills, MI 48326 1-800-444-8982

Please keep this letter with your Warranty booklet for future reference, and deliver it to any new owner, along with the owner's manual.

We hope you are enjoying the exceptional performance and fuel economy of your TDI® Clean Diesel vehicle, and we wish you many more miles of driving pleasure. Thank you for driving a Volkswagen!

Sincerely,

Volkswagen Service & Quality
