SiriusXM Satellite Radio Activation Confirmation During PDS

Confirmation Procedure

1. With the vehicle in a clear line of sight to the sky, power ON the radio.

NOTE

The vehicle does NOT have to be running, but the radio MUST be powered ON.

2. Change radio source to satellite (SXM) and tune to channel 0.
3. Are SiriusXM channels 7, 9, 152, and 175 displayed and audible?
 - **YES** — The audio portion of the SiriusXM system is already activated. (This should be the case for most vehicles.) The SiriusXM satellite radio is activated and ready for use.
 - **NO** — Continue to the Activation Procedure.

Activation Procedure

1. Ensure the vehicle has a clear line of sight to the sky.
2. Change radio source to satellite (SXM) and tune to channel 0.
3. Write down the 8-digit radio ID code.

NOTE

Check the radio ID code carefully. The letters I, O, S, or F are NOT used in the radio ID.

4. Log on to <https://www.siriusxm.com/refresh> and follow the activation instructions, or call 1-800-TLC-XMXM (1-800-852-9696) and follow the voice-activated prompts for dealer demo activation.

The SiriusXM activation signal is sent to the vehicle immediately and will continue to be sent for up to two hours. The radio may need to remain ON for up to 30 minutes to receive the SiriusXM activation signal.

5. After 30 minutes, return to the Confirmation Procedure to ensure activation is complete. Repeat steps 1 – 4 of the Activation Procedure, if necessary.
