Subject

Marker Light Bracket Relocation Eliminates Rear Fuel Tank Fill Interference

Whats New Abstract

Information Only - A frame mounted left-hand marker light bracket interferes with the rear fuel tank fill location. A redesigned bracket can be purchased that relocates the marker bracket to the front fuel tank bracket to eliminate interference.

Condition

A frame mounted left-hand marker light bracket interferes with the rear fuel tank fill location. If desired, a redesigned marker light bracket can be purchased.

Chassis Affected

Models 579, 567,389, 367, 365, and 220 chassis built from 04/22/2019 through current.

Action

Information Only

This bulletin provides information about the availability of a redesigned left-hand frame mounted side marker bracket. The new design allows the marker light bracket to be relocated to the front fuel tank bracket and eliminates fuel tank filler interference.

Warranty

No Warranty Applicable - Customer Purchase

Parts

Parts are available from PACCAR Parts.
