

**Launch Date:** Monday, February 14th 2022

**Release Notes:** With this update, we're introducing enhancements and improvements to some of the cameras and sensors that support the advanced driver assistance system in your Lucid Air. Before beginning this update, make sure your vehicle is not plugged in.

- We increases the maximum speed for Surround View Monitoring to 16 mph.
- We enhanced the LiDAR (light detection and ranging) sensor by adjusting it to operate according to the gear you've selected.
- Other minor updates, improvements, and fixes.

**Estimated Install Time:** 1 Hour

- In order to receive 1.1.61, 1.1.5 must already be installed.
- Lucid recommends customers update their Lucid mobile application prior to initiating the installation of the software update.
- The vehicle cannot be plugged into a charger during this update.
- Doors and trunks must be closed and locked prior to install.
- Keys, including mobile phones, must be kept at least 30 feet away from the vehicle during install.
- Customers no longer need to disconnect from WiFi prior to installation.
- Do not open any doors or trunks until install is complete.
