

SSM 50602 - 2021 F-150 - No Vehicle ID Or Communication With State Emissions Testing Machine

Some 2021 F-150 vehicles may not be able to complete a state emissions test due to the vehicle not being identified and/or not communicating with the emissions testing equipment. This may be due to the configuration in the gateway module (GWM). To correct the condition, download and run the GWM - Gateway Module A Configuration app using the latest version of the Ford Diagnosis and Repair System (FDRS). For claiming, use causal part 14G490 and applicable labor operations in Section 10 of the Service Labor Time Standards (SLTS) Manual.
