

Due to an axle component shortage, General Motors USA has changed roughly one hundred of our MY22 chassis inventory from 14,200 lbs to 12,300 lbs -159” Wheel Base. We have limited MY2022 Minotour chassis remaining in our bailment pool. Please review the Dealer Portal bailment list at your convenience to see available inventory.

All orders impacted by this change have already been addressed with the Dealers. Changes will be processed as needed.
