

TECH TIP

**DIESEL FUEL IN THE DIESEL EXHAUST FLUID
(DEF) TANK TECH TIP**

**GROUP: 0-GENERAL
TECH TIP NO: TT-22-005
DATE: 3-7-2022**

SUBJECT VEHICLES:

2022MY-Current L-Series and XL Series Trucks

Note: This Technical Tip is provided as technical information and is not authorization for a warrantable repair.

OVERVIEW

When diesel fuel has been mistakenly added into the DEF tank, the following repair procedure must be followed. Open a TechAssist case for documentation purposes, replace the DEF sender, flush the DEF tank and DEF lines.

For any Cummins related components, it will be necessary to verify with Cummins and/or refer to the Cummins Service Information for their specific service procedures.
