

**Launch Date: March 28, 2022**

## **OTA CAMPAIGN NO. 1.2.1**

**Release Notes:** With this update, we're improving your climate control and vehicle access experiences. We've also improved your display for a smoother user experience.

### **Climate Control**

We've improved and enhanced your Remote Control Climate experience, giving you additional control over your cabin and steering wheel temperature even when you aren't in your vehicle.

We've also made additional climate control enhancements for better control and comfort.

### **Access**

We fixed an issue where your door handles might not extend as you approach when using a Mobile key.

We've also improved Passive Entry responsiveness to be able to detect your key again after your vehicle automatically locks.

### **Display Updates**

We've improved the Pilot Panel for a better overall user experience. It will now be more responsive for a smoother navigation between your favorite apps.

### **Other Minor Updates**

Other minor updates, improvements and fixes.
